OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	3/8/01		Yes	3	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** White Goods Creek is an approximately 4-foot wide, low gradient stream with a gravel/cobble substrate flowing through dense alder and salal. The stream is located just west of the Hydaburg dump at T. 77S., R. 84E., Sections 17 and 18. During a stream inspection on March 8, 2001, I used an electrofisher to determine the presence of 2-year old coho salmon both above and immediately below the dump road. I surveyed the rest of the stream down to saltwater on July 26, 2001, to determine the location and length of the entire stream. See attached map. Coho fry and spawning habitat were observed along the majority of the lower half of the stream all the way to saltwater.

**ACTION:** Add White Goods Creek to the AWC for coho rearing for the following distances: from the Hydaburg dump road 500 feet upstream and from the Hydaburg dump road 2,500 feet downstream to saltwater. The stream emerges at saltwater on the northwest side of a small island in Sukkwan Strait. See attached map.

Date: 7/30/01

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
